EPDs

The EPDs reported in this catalog are the Fall 2017 numbers, as reported by the American Simmental Association.

Delivery

Trucking will be available sale day.

Sale Videos

Sale videos and pedigrees can be viewed prior to the sale from your computer or smart phone at www.dvauction.com/video_catalogs.

Herd Health

Many of our consignors are certified Brucellosis free and some are TB certified also. All of the consignors to "The Magnolia Classic" have excellent herd health programs consisting of deworming, stringent vaccination procedures and balanced mineral usage. All animals sell with health certificates from each consignor's personal veterinarian.

Online Bidding

We are pleased to offer the sale broadcast "live" over the internet through DVAuction. To watch or bid online, visit www.dvauction.com, to register and apply for bidding prior to the sale. If you have any questions, please call DV Auction at 402-316-5460 or 402-474-5557 or via email at support@dvauction.com.

After the sale, buyers should contact Little Creek Farm to arrange payment and delivery of your purchase(s).

Please Note: High-speed Internet access (DSL, T-1, or Broadband) is required to be able to bid successfully during the sale. If you have any questions, please contact DVAuction at (402) 316-5460. We recommend that you register by October 27th for online bidding during the Magnolia Classic Sale.

Sale Terms & Conditions

Cash or check, in U.S. Dollars. Each animal will be sold to the highest bidder. The auctioneer will settle any disputes as to bids. All cattle are to be paid for by the purchaser immediately after the sale and will not be released until settlement has been made, unless prior arrangements have been made. Cattle will not be transferred until paid for in full. The sale will be conducted in accordance with the complete Suggested Sale Terms & Conditions as set forth by the American Simmental Association.

Announcements

All announcements at the sale by the owners or sale staff will take precedence over statements in the catalog. We reserve the right to remove any sale lot not meeting the sale specifications prior to the sale.

Liability

All persons who attend the sale do so at their own risk. Neither Little Creek Farm, LLC nor the guest consignors (sellers) assume liability, legal or otherwise, for any accidents that may occur.

Opportunities to Support the Fullblood Simmental Fleckvieh Federation

Once again Little Creek Farm, LLC is honored to host the FSFF Annual Meeting. In conjunction with the meeting, the FSFF is sponsoring a silent auction with the proceeds to benefit the Federation. There are some special items to be offered. For those unable to attend the sale and view the items, they will be posted on the FSFF website. Also, be sure to check out the two live lots on page 5 of this catalog. These are two amazing lots and will start off the sale on Saturday so be here or be online to bid.

Fleckvieh Simmental & Red Angus Cattle

Welcome to The Magnolia Classic 2017. Little Creek Farm is pleased to have 23 breeders as guest consignors. As you review this catalog, you will discover bred and open heifers, bred mature cows, mature pregnant embryo recipients, bulls, a flush, embryos and semen. Sprinkled in with the Full Fleckvieh genetics you will find a few fullbloods and purebreds as well as a few crossbreds. You will find the contact information for all the consignors listed in the catalog and they will welcome your calls and emails to answer any question you may have about their consignments.

The Fullblood Simmental Fleckvieh Federation Annual Meeting will be held on Friday night, October 27, and will include an educational component focused on cattle reproduction. So please come on Friday, view the cattle, enjoy food and fellowship, and participate in the meeting. This will be a great opportunity for you to ask questions about any reproductive issues you would like addressed.

A silent auction will be held to benefit the FSFF on Friday and ending at 11:30 am Saturday morning. You are invited to join the fun with a donation to the silent auction. You may even find something you would like to take home.

As President of the FSFF, I am pleased to share with you a recent vote by the Board of Directors. The FSFF will be extending FREE membership to the buyers of any Fullblood and/or Fleckvieh Simmental animals. Any free memberships opportunities derived from private treaty sales are to be reported to the FSFF Coordinator. We look forward to growing the Federation not only in numbers, but also in interest.

Mark your calendar, reserve your room, and be a part of The Magnolia Classic 2017.

Mikell Davis

Little Creek Xpress 840X

The influence of Little Creek Xpress 840X...

One of the first things that you will appreciate when you look at the pictures of Little Creek Xpress 840X daughters offered in The Magnolia Classic 2017 is their uniformity and consistency. It is not much of a stretch to apply the notes for one daughter to all of his daughters. Certainly there are differences, but their similarities prevail. You will appreciate them even more when you see them in person.

Consignor: Little Creek Farm, LLC

- AI: 2/4/17, Crossroad Radium 789U. Confirmed safe.
- Before LCF Lyda 206L, there was HVR Leann Rimes 518F. Now there is Little Creek Camile C503. Camile and her sister, Little Creek Dixie 50D (Lot 16), may be the last Lyda daughters. We have embryos in the tank, so we are taking a big chance that we will get at least one more daughter to keep in the herd. When you evaluate Camile in person you will smile and say, "Yep, she is the real deal!" She is in the top 30% for 11 EPDs and has exceptional thickness, depth, and length of spine. Camile has excellent pelvic structure that transitions to long, deep, and thick rear quarters. You will recognize the proven sires and dams in her pedigree which is 7/8 German and 1/8 South African genetics. Her Radium pregnancy adds to her value. Camile is the DONOR cow that you are looking forward to having in your front pasture!

Consignor: Little Creek Farm, LLC

- AI: 1/26/17, VPFS Brantz 12B. Confirmed safe.
- Cori is an Xpress daughter that goes back to Mezcacal Jr. (Vernon Hoffman) and MF Candi 33K, a Siegfried daughter on the dam side of her pedigree. You will enjoy reviewing her full pedigree because you are going to see some rare German genetics.
- She is a strong topped, big barreled heifer with a long hip and good pelvic structure. Her conformation is complemented by her fluid movement. She is in the top 35% of 10 Fullblood EPDs. Plus, her Brantz pregnancy gives you a chance of a polled calf.

BRED HEIFER

Little Creek Carson C509

Consignor: Little Creek Farm, LLC

• PE: 4/15-5/2/17, VPFS Brantz 12B. Confirmed safe.

• Carson is another heifer with a proven pedigree. Her Sunny Valley Sargent 24S dam, 510U, is out of one of the great cows to ever walk the Little Creek pastures, KFFC Jumbo Hafke. This deep red double masked heifer is deep, thick, and long. She has tremendous body capacity and displays a very balanced conformation. Carson is another heifer with excellent pelvic structure with tremendous rear quarters. Fourteen of her fullblood EPDs are in the top 35% with 7 in the top 10%. Carson was pasture bred to VPFS Brantz which gives you an opportunity for a polled calf.

Lot 3 - Little Creek Carson C509

BRED HEIFER

Little Creek Clancy C510

• AI: 2/4/17, Double Bar D Rival 201A. Confirmed safe.

• Clancy is walking proof that maternal lines are critical to success. She is a granddaughter of LCF Lyda 206L, and success is written all over Clancy. She is a double goggled heifer that has dark hooves and is deep and thick with tremendous capacity. Clancy is smooth shouldered and has excellent overall conformation. She has 13 EPDs in the top 35% with six being in the top 10%. Clancy is bred to Double Bar D Rival 201A, a mating that should create some excitement at calving time.

Lot 4 - Little Creek Clancy C510

Consignor: Little Creek Farm, LLC

• AI: 6/26/17, VPFS Dylan 15D. Confirmed safe.

• Ever have a heifer you wish would have been halter broke for your kids? Well, Chey 23C is that one! 23C could have followed after her dam, JL Chance's Sunny 292, with show ring presence as a heifer that was out done by her success as a broodcow/donor. We never did get "Chey" into the show ring, but she is bound to do a heck of a job in the pasture! With high quality full and half siblings present at Little Creek and Ligon Simmentals, proof of the maternal line is evident, and the sire speaks for himself!

Chey shows good structure, with ample pelvic capacity, coupled with enough femininity. She has the Fleckvieh influence to add the "punch" to improve milk, and ultimately offspring marketability. Breed her Purebred, Fleck, Angus, or even Clubby! She will get it done however you wish to use her!

She sells bred to our own Fleck/Angus VPFS Dylan 15D. Study his reference sire picture and appreciate his added mass and eye appeal.

Lot 7 - Little Creek Chelsy C523

• Take a look at the dam side of Chelsy's pedigree, and you will find Antonius, Gidsco Appollo, Overhall Hivy, Herode, and Maurus. Chelsy's dam, Urania, was purchased from Blair Farms, Maryville, TN and has proven to be a complement to the Little Creek herd. Chelsy is a mahogany red, full masked heifer that demonstrates a balanced conformation with good length, depth and excellent pelvic structure. Six of Chelsy's EPDs are in the top 35%. Her REA EPD is in the top 3%, and she ultrasounded 1.43 sq. in. REA cwt to prove it! You can look forward to a dark red Radium sired calf that is sure to please.

Lot 8 - Little Creek Crista C529

• Once again, Xpress has proven that he works well on old line German genetics. Crista's dam has the following German greats in her pedigree: Neff, Scottish Neff, Solway Adonis, Blythe, Rogant, Moll 2nd, and BEL Helga 9th who is buried next to our backyard fence. Crista has a balanced conformation that demonstrates a smooth shoulder that blends into a long, deep body, and a long hip with excellent pelvic structure. Crista is bred to the top calving ease bull, Radium.

• Take a good, close look at this full masked Xpress daughter that offers a bit of a different pedigree on her dam's side with Eldorado, DFM Marcus 14M, and Dayton's Pol Neumann. Claire is another heifer that demonstrates balance with excellent thickness and depth of body that translates into tremendous body capacity. For those of you who like your cows to have four dark hooves, Claire fills the bill. Thirteen of Claire's EPDs are in the top 35% with nine in the top 10%. She is another front pasture cow that has a tremendous future ahead of her, and her future will have a great start when her Radium calf hits the ground.

Lot 9 - Little Creek Claire C536

PE: 3/16-5/2/17, VPFS Brantz 12B. Observed bred on, 3/25/17. Confirmed safe to the observation date.

• Callie is a twin to Lot 11. She is a full masked, dark red heifer that has demonstrated very good compensatory gain since weaning. This dark hooved heifer has the typical appearance of an Xpress daughter with a deep, thick body that is wide from front to rear. Callie's long hip transitions into deep, thick rear quarters. She is a heifer with tremendous potential whose EPDs show 8 in the top 35%. Callie is pasture bred to VPFS Brantz for a calf that if possible, will demonstrate even more thickness and depth.

Lot 10 - Little Creek Callie C548

• I could pretty much copy Callie's comments for Cari. They are very much alike as you would expect. Cari and Callie's combined wean weight was 921 pounds with no creep, so when you evaluate these twins think about the maternal potential before you. Cari has a goggle around her right eye and also walks on four dark hooves. She has all the essentials: thickness, depth, and stretch in a pleasing to the eye conformation. Take a look at her 1.34 REA cwt. Eight of Cari's EPDs are in the top 35%. She is bred to Radium.

• AI: 6/25/17, Crossroad Radium 789U. Confirmed safe.

• Dixie is Lyda's last natural calf and a full sib to Lot 1. She weaned light due to Lyda's failing milk production, but she has demonstrated excellent compensatory gain since weaning. Dixie has a wrap around goggle on her right side with a large connected "tear drop". Her dam, LCF Lyda 206L and her granddam, HVR Leann Rimes 518F, had similar "tear drops". Dixie is a product of two of the best of Little Creek, and I am sure that she will prove herself to be a valuable addition to her new owner's herd. She is deep and thick and has a tremendous rear quarter. Her EPDs are in the top 1% for milk, 3% for REA, and 5% for MWW. Her pregnancy to Radium makes her an extra value feature.

• Dorsey looks a lot like her dam looked as a bred heifer. Fred Scheutze and I went together to purchase Majorie from Brian Valentine at Murphy Clark's Yankee Creek Ranch Sale in Oregon in 2006. If you like them dark red with double goggles, this is a pleasing sight to see. This long bodied, deep sided heifer has excellent thickness. Dorsey's tremendous length of hip translates into deep, thick rear quarters. She is the total package who has nine EPDs in the top 30% of fullblood Simmentals. (CE and REA are in the top 1%, API is in the top 2%, YG is in the top 3%, and BW is in the top 4%.) Dorsey is bred to our young herd sire Little Creek Caden C117.

Lot 17 - Little Creek Dorsey 54D

T5 Zamboo

Lot 18 The influence of T5 Zamboo...

Offering choice of two heifers out of this group of three. All three are out of the T5 cow. Ask Fred about her sire, BHR Mr Zuboomafo. They won't be the tallest cattle, but when fully mature, they might be the thickest. The sire of lot A is Woonallee Boulder (Evan x Ashante). The sire of lots B & C is ICC Game Changer (Porters Reserve x Yankee Nina).

Lots 18A & 18C sell confirmed to JS PL Darius D41, a bull that combines maternal and growth genetics. (Top 25% for growth and top 10% for milk). Look at his extended pedigree... Siegfried, Zeus, Argonne, Iglhoff, Hamlet, Sabat, Moll2d, Romulus, Hackenberg, Bold, and Orange River. These will be his first calves. Lot 18B was bred AI to Great Guns Pauli 27Z.

• AI: 6/12/17, HVR Samson B83. Confirmed safe.
 PE: 6/23-7/17/17, PKC Mr. Knight (3277719).

• Safe to A.I. date, this double goggled, dark red heifer is sired by Rocking R Mr. Magnum (same sire as Lot 21 Rocking R Ms. Agnes). This heifer has a strong blood line going back to Bar 5 SA Piona, BHR Orange River and Rain Valley Emma on the dam side and Canadian Neff, DDD Gunda Cinnamon, HVR ZSA ZSA 624E (going back to Hacks Fraulein) on the sire side. She is bred to the easy calving bull HVR Samson.

Consignor: CJ Simmental Ranch

• AI: 7/2/17, VPFS Brantz 12B. Confirmed safe.

• Miss CJ D602 is a heifer you will really want to examine closely. She is dark red and polled with double goggles. More important is her depth of body and muscle with a pedigree to match. Her sire, Outback of Double Bar D, is a polled bull developed by Brian Valentine and on her dam's side goes back to Shawacres Jahari 50L. Sunny Valley Sargent also appears on both sides of her pedigree. She is confirmed bred AI to VPFS Brantz 12B on 6/30/17 for an early April calf that will likely be polled and could be homozygous polled. I believe you will really want to take this heifer home.

Consignor: Hay1 Farm

- This fancy embryo pair of sisters is coming out of a great Shear Force daughter we purchased as a weanling from the Triple C dispersal. Here is a beautiful, clean fronted, deep sided heifer that will add eye appeal to any program. Her mother is the premier donor at Kenco Cattle Co. in TN, and is simply an awesome cow. This embryo daughter is sure to follow in her footsteps.
- Sells open.

Consignor: Old Magnolia Farm

- Dala is a fine example of the heifers being produced by Red Oak Tom 306A. Like her sisters, she was calved with no problem, has a calm disposition, and grew quickly. She has both eyes covered, a strong top line, and the pedigree to back up her potential as a front pasture cow in your herd. She is one of only two heifers that we have sold out of Tom since his first calf crop. If you inspect this heifer and her ancestors, we feel you will want to take her home.
- Sells open.

Consignor: Little Creek Farm, LLC

• Drew is 99.4% Fleckvieh. His sire, Gergen Bravo B403, has a Brink Simmental sire and dam. Jerry Brink successfully breeds Fleckvieh Simmental cattle for consistency and performance year after year. The Bravo progeny demonstrate those qualities. Drew is a wide based bull that is exceptionally deep and thick and has one of the widest tops from front to rear that you will see. Drew is long hipped with rear quarters that are thick and deep. He is another bull that will add to the bottom line when you sell his progeny. We recommend him for use in a mature cow herd.

Consignor: Little Creek Farm, LLC

• If you study his make, he offers sound structure of legs and feet, good shape of rib, strength though the spine, and a well developed/well shaped set of testicles. 22C will add the pounds at weaning time, while still offering the potential to moderate frame score.
 • When considering retaining females sired by 22C, the payoff should be great. His dam, "Sunny" Z292, carries good milk EPD numbers, with an admirable conformation of udder and teats. Additionally, with the eye appeal of his dam, and the numerous show quality individuals produced by his sire, 22C has the make to sire show quality calves.
 • The possibilities are great...use him with flexibility. You won't go wrong with the infusion of Fleckvieh genetics.
 • Results of Homozygous Polled and Coat Color tests pending.

MF MR. EVAN 14P
MF MS EVAN 21W - 2531047
 BHR ANJULLA R080

- A sure way to help build a sound foundation of Fleckvieh genetics is through the acquisition of these female sexed IVF embryos of VPFS Brantz 12B x MF Miss Evan 21W.
- The mating is sure to instill consistency of skeletal structure, with excellent leg set, smooth shoulder, great length of hip, and great shape of rib. 21W was purchased in part because she possessed these same qualities as a heifer, and was (and still is) a female that covers ground effortlessly, with extreme fluidity of stride. As a cow, 21W has developed a nearly flawless udder, tending to superior milk production (2015-2016 weaned off 1500 pounds of calf...natural calf, and grafted ET calf).
- When considering Brantz, there is nothing sacrificed. He possesses the same qualities, with impeccable ability to work cows in the pasture. Additionally, this mating will effectively infuse docility into a herd if needed, and help moderate frame score, while still pounding the scales at weaning time.
- These qualities have been exemplified by the heifer calf at side, which is slated to be halter broke, making her way to the showing, to help represent the qualities we feel will help our program at Little Creek move forward, and be an asset to the Fleckvieh breed as a whole.

MF MS EVAN 21W - 2531047
 BHR ANJULLA R080

- 21W has been a long-standing favorite of ours at Vantage Point, and now at Little Creek. Phenotypically, she is what I like to see in cow....moderate framed, good legs and feet, and an outstanding udder. For us, she is the prototypical functional female.
- How can we improve on such a female? We can add a little more length of muscle from the rump to the hock. We can add a little more ribeye, and we can intensify the pigment of the coat. LCF Xpress 840X x MF Miss Evan 21W is the mating to attain such a phenotype.
- We have worked to build a herd deep in consistency, and this mating will only make that more possible. While we would like to continue to utilize these embryos 100% in herd, we feel cooperation is necessary to continue to move forward as a breed.

• We offer Crossroad Radium 789U for your consideration in your next heifer or cow mating. We believe that Radium is the bull to use in any situation, and it would appear that we are in good company with numerous other Canadian and U.S. breeders using him on heifers and mature females. In fact, there are over 400 animals registered with the Canadian Simmental Association sired by Radium. Radium makes high quality females and bulls, stamping them consistently with extremely correct conformation, spring of rib, and that style that catches your eye in the pasture or the show ring. Radium offspring continue to sell well in Canada and the U.S., demanding top dollar and he continues to be a "Go-to" bull when breeding heifers. He is a proven calving ease specialist.
• Jason Gress/Vantage Point Farm and Antietam Valley Farm continue to be the sole marketers in the U.S. for the semen on this proven bull.

Consignor: **Faulkner Farms & Little Creek Farm, LLC**

Little Creek Zeus 139Z is one of three individuals we were fortunate to get out of five embryos we purchased from Rick Batty of Wyecrest Simmentals. The other bull walks in a herd in Indiana and the heifer walks the pastures of Little Creek. The dominant feature of Zeus' pedigree is his dam who was productive while 17 years old. Zeus was selected to stay at Little Creek, but Mason talked me into letting him walk with the Faulkner cows. Good decision on Mason's part. He has sired calves that will make you smile when you look at them. His heifers are destined to be a significant part of the Faulkner herd.
